Speech to Text API v3.0

 API definition

Speech to Text API v3.0.

Copy Model

This method can be used to copy a model from one location to another. If the target subscription key belongs to a subscription created for another location, the model will be copied to that location. Only adapted models are allowed to copy to another subscription.

Select the testing console in the region where you created your resource:

Australia East (<https://australiaeast.dev.cognitive.microsoft.com/docs/services/speech-to-text-api-v3-0/operations/CopyModelToSubscription/console>)

Brazil South (<https://brazilsouth.dev.cognitive.microsoft.com/docs/services/speech-to-text-api-v3-0/operations/CopyModelToSubscription/console>)

Canada Central (<https://canadacentral.dev.cognitive.microsoft.com/docs/services/speech-to-text-api-v3-0/operations/CopyModelToSubscription/console>)

Central India (<https://centralindia.dev.cognitive.microsoft.com/docs/services/speech-to-text-api-v3-0/operations/CopyModelToSubscription/console>)

Central US (<https://centralus.dev.cognitive.microsoft.com/docs/services/speech-to-text-api-v3-0/operations/CopyModelToSubscription/console>)

Central US EUAP (<https://centraluseuap.dev.cognitive.microsoft.com/docs/services/speech-to-text-api-v3-0/operations/CopyModelToSubscription/console>)

East Asia (<https://eastasia.dev.cognitive.microsoft.com/docs/services/speech-to-text-api-v3-0/operations/CopyModelToSubscription/console>)

East US (<https://eastus.dev.cognitive.microsoft.com/docs/services/speech-to-text-api-v3-0/operations/CopyModelToSubscription/console>)

East US 2 (<https://eastus2.dev.cognitive.microsoft.com/docs/services/speech-to-text-api-v3-0/operations/CopyModelToSubscription/console>)

France Central (<https://francecentral.dev.cognitive.microsoft.com/docs/services/speech-to-text-api-v3-0/operations/CopyModelToSubscription/console>)

Japan East (<https://japaneast.dev.cognitive.microsoft.com/docs/services/speech-to-text-api-v3-0/operations/CopyModelToSubscription/console>)

Japan West (<https://japanwest.dev.cognitive.microsoft.com/docs/services/speech-to-text-api-v3-0/operations/CopyModelToSubscription/console>)

Request URL

`https://{endpoint}/speechtotext/v3.0/models/{id}/copyto`

Request parameters

id

string

Format - uuid. The identifier of the model that will be copied.

Request headers

Content-Type

string

Media type of the body sent to the API.

Ocp-Apim-Subscription-Key

string

Subscription key which provides access to this API. Found in your Cognitive Services accounts

(<https://portal.azure.com/#blade/HubsExtension/BrowseResourceBlade/resourceType/Microsoft.CognitiveServices%2Faccounts>).

Request body

The body contains the subscription key of the target subscription.

application/json

Sample Schema

```
{
  "targetSubscriptionKey": "KeyForTheSubscriptionTheModelIsSupposedToBeCopiedTo"
}
```

Response 201

The response contains the location of the entity as header.

application/json

Sample Schema

```
{
  "self": "https://westus.api.cognitive.microsoft.com/speechtotext/v3.0/models/021a72d0-54c4-43d3-8254-27336ead9037",

  "description": "This is a language model"
}
```

Response 400

In case the operation cannot be performed successfully with the specified values.

application/json

```
{
  "code": "InvalidRequest",
  "message": "The base model isn't valid for this operation.",
  "innerError": {
    "code": "InvalidBaseModel",
    "message": "The base model isn't valid for this operation."
  }
}
```

Response 401

In case the user isn't authorized.

application/json

```
{
  "code": "Unauthorized",
  "message": "Authentication is required to access the resource."
}
```

Response 403

In case authorized user isn't known or doesn't have the required permissions.

application/json

```
{
  "code": "Forbidden",
  "message": "No permission to access this resource."
}
```

Response 404

In case the specified entity doesn't exist

application/json

```
{
  "code": "NotFound",
  "message": "The specified entity cannot be found."
}
```

Response 429

In case the rate limit has been exceeded.

application/json

```
{
  "code": "TooManyRequests",
  "message": "The rate limit has been reached. The timeout in seconds can be found in the Retry-After header."
}
```
